featuring...

12 talks, with technical bits and proposals
delivered by 21 speakers
Welcome to the

Haskell Implementors’ Workshop 2014
Gothenburg, Sweden
6 September, 2014

featuring...

- ...12 talks, with technical bits and proposals
  ...delivered by 21 speakers ⇒ 1.75 speakers per talk
- ...selected by a programme committee of 7 Haskellers with different areas of interest

Due to time constraints, we could not accept all proposals, but tried to maximise the number of accepted talks.
Welcome to the

Haskell Implementors’ Workshop 2014
Gothenburg, Sweden
6 September, 2014

featuring...

• ...12 talks, with technical bits and proposals
  ...delivered by 21 speakers ⇒ 1.75 speakers per talk

• ...selected by a programme committee of 7 Haskellers with different areas of interest
  Due to time constraints, we could not accept all proposals, but tried to maximise the number of accepted talks.

• Lightning talks in the afternoon sessions
If you (want to) give a talk...

Speakers in the announced programme:
Please edit the workshop page on the Haskell wiki

- upload/link to your slides
- edit/add to the abstract as you see fit
- identify yourself as the speaker (“multi-speaker” talks)
If you (want to) give a talk...

Speakers in the announced programme:
Please edit the workshop page on the Haskell wiki

- upload/link to your slides
- edit/add to the abstract as you see fit
- identify yourself as the speaker ("multi-speaker" talks)

Lightning session speakers
Please sign up for lightning talks

- write your name and title on the flip chart
- be prepared to speak in the lightning sessions (afternoon)
- add material online after today if you like
and if you are still around at night:

You are invited to the

FARM evening event

with free performances of art, music, and design.
...and if you are still around at night:

Free evening of live performances
at 3:e Våningen
Saturday, Sep 6, 8PM

- Sam Aaron and Dominic Orchard with Sonic Pi
- Davide della Casa and Guy John with LiveCodeLab
- James Noble with Classic computer science algorithms assembled into algorave
- Gabriel Sanchez exploring the boundaries of stability and chaos by live coding with the Wolfram language + SuperCollider

Details at
http://functional-art.org/

Group leaves from registration desk at 6:40PM!
